

Mill Hill u3a – WhatsApp Policy

Mill Hill u3a would prefer that their Beacon system is used as the main communication method with members. This is both for communications to the entire membership, and for Group Leaders to communicate with members of their groups. This ensures that data is GDPR compliant in not disclosing to others, members information, such as their email address.

The Executive Committee acknowledge that several Groups wish to use WhatsApp to exchange information between group members. It has been agreed that this is permissible PROVIDED that the Group Leader obtains explicit consent from any member wishing to join the WhatsApp group that their mobile phone numbers can be disclosed to all current and future members of that WhatsApp group.
